

Pryor, Austin

DES 157

3/3/16

Objectives to test with the current Prototype:

1. Click a single key and hear the audio playing (one of the first 3 notes)
2. Click the keys in rapid continuation to hear the sound files overlap one another.
3. Imaging a visualizer like the static image of the one I am showing, and decide if that is a necessary feature to add to the experience.
